

Tacky Mats are multi layered clean film full adhesive layers that effectively capture dirt and dust from foot and wheeled traffic before entering controlled or clean environments where contamination needs to be avoided.

An adhesive layer on the bottom of the mat sticks to the floor preventing movement. Each layer peels off to reveal a new, clean surface preventing microbial growth and contamination.

Walk over a Tacky mat to remove dirt and contaminants

Simply peel off to reveal a new, clean layer

Locations where Tacky mats can provide an ideal solution include hospitals, cleanrooms, spray paint shops, construction sites, laboratories, electronics and computer rooms.

We sell these products by the case.  
There are four mats to a case and 30 sheets per mat.

Sizes available: 18" x 36", 24" x 36" and 26" x 45"
